# DEVELOP A CUSTOMIZED PING COMMAND TO TEST SERVER CONNECTIVITY

Aim:

To test and verify the connectivity blw the local computer @ remote server. using the ping command in windows.

Procedure:

* open command Prompt in windows.
* type Ping www.google.com and Press Enter.
* type ping www.google.com -n 5 to send 5 echo requests.
* type ping www.google.com -l
* verify the connectivity blw the local computer and Server.

Code:

```
import subprocess.
import platform.

def ping_server(host, count=4):
    """Ping a server and display the
    result."""
    if platform.system().lower() == "windows":
    else:
        command = ["ping", "-c", str(count), host]

    try:
        result = subprocess.run(command,
                                capture_output=True,
                                text=True)

    else:
        print("\n[-] server is not
              reachable")
    except exception as e:
        print("Error:", e)
host = input("Enter server IP address or
             domain name:")
count = int(input("Enter no of req":))
```

Result:

The python script successfully detected the system OS, determined
